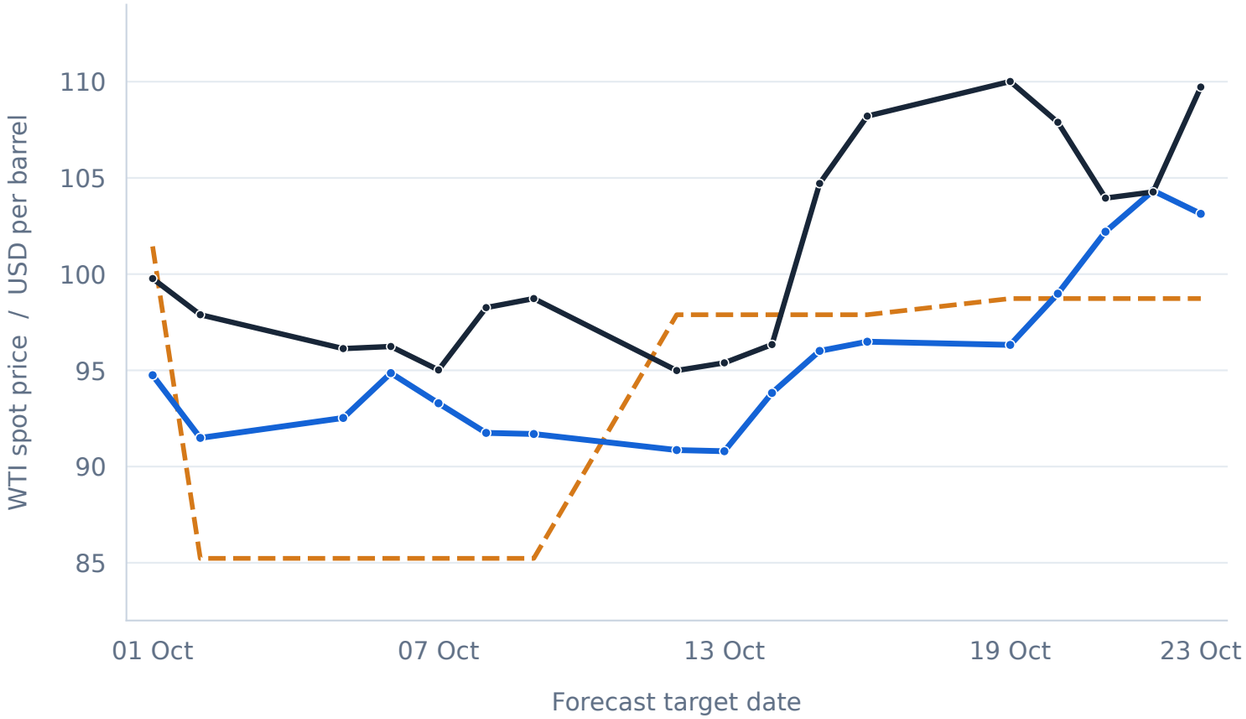
FINAL v6 / OCTOBER EVALUATION

Rolling forecasts vs random walk and observed WTI

1–23 October 2026 · Price in USD per barrel · Model parameters frozen on 30 September

Observed spot price | v6 point forecast (median) | Random walk · latest published spot

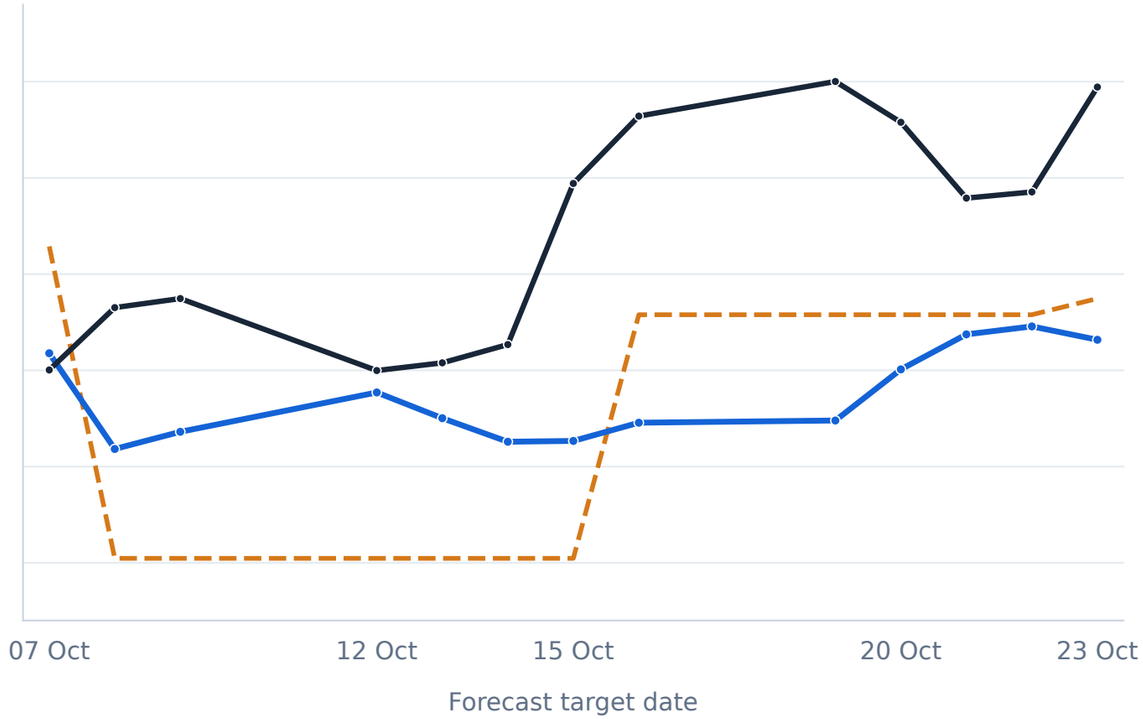
1-day ahead | 17 realized targets



RMSE v6 6.63 / RW 9.11 USD

27.3% lower RMSE than the published-spot RW

5-day ahead | 13 realized targets



RMSE v6 10.07 / RW 11.25 USD

10.6% lower RMSE than the published-spot RW

Each point is a separately issued daily rolling forecast, aligned to its target date. Horizons count quoted days.

RW holds the latest spot quote available at issue time under the project publication protocol. October is retrospective evaluation only.
